NEHA NAAZNEEN

Java Software Engineer — Spring Boot, Microservices, Distributed Systems

(+91) 9640938064 | nehanaazneen17@gmail.com LinkedIn | GitHub

EXPERIENCE

AutoRABIT (CodeScan) | Software Engineer Jul 2024 – Present
Hyderabad, India

- **Owned the design and development of Java 17/Spring Boot services and REST APIs** for CodeScan, a multi-tenant enterprise application supporting **700+ quality and security rules across 4 Salesforce code and metadata types**; implemented transactional data access using Hibernate, JDBC, and PostgreSQL.
- **Led the architecture and delivery of AI CodeFix**, building an asynchronous, event-driven workflow between Java/Spring services and Python workers using AWS SQS, ECS Fargate, and S3; implemented job-state synchronization, credit and billing gates, secure callbacks, and failure recovery for hours-long workloads.
- **Partnered with React/TypeScript frontend, product, and QA engineers** to define REST contracts, API data flows, asynchronous UI states, error handling, integration tests, and UAT scenarios for new analysis and remediation features.
- **Owned production application support through a formal on-call rotation**, using telemetry, logs, and monitoring data to diagnose cross-service failures, communicate technical findings, perform root-cause analysis, and deliver production fixes.
- **Strengthened engineering quality through design reviews, code reviews, and mentoring 6 junior engineers**, contributing reasoned recommendations on service boundaries, data models, transactional consistency, and failure-recovery strategies.

AutoRABIT (CodeScan) | Junior Software Engineer Apr 2023 – Jul 2024
Hyderabad, India

- **Redesigned concurrency-sensitive analysis and reporting pipelines** with retryable and idempotent processing, reducing workflow failures by approximately **35% during peak load**.
- **Engineered asynchronous scheduled workloads** for usage reporting and license monitoring with **4 reliability controls**: distributed locking, idempotency, retries, and partial-failure recovery.
- **Increased automated test coverage to approximately 80%** using JUnit and Mockito, while delivering releases through Git, Maven, Jenkins CI/CD, Docker, integration testing, defect resolution, and UAT.

SKILLS

Languages	Java 17, Python, SQL, JavaScript/TypeScript, C++
Backend	Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, JDBC, REST, SOAP, Microservices
Data & Distributed Systems	PostgreSQL, AWS SQS, Redis/Jesque, Event-Driven Processing, Concurrency, Idempotency
Cloud & DevOps	AWS, ECS Fargate, S3, Docker, Linux, Git/GitLab, Maven, Jenkins CI/CD
Testing & Operations	JUnit, Mockito, Integration Testing, Telemetry, Monitoring, On-Call, Root-Cause Analysis

EDUCATION

B.Tech in Computer Science Engineering (Artificial Intelligence and Machine Learning)
Jawaharlal Nehru Technological University, Hyderabad Dec 2020 - Jul 2024
CGPA: **8.5 / 10**
